

OOXML reader qualification brief

Original content for layout, section, and review-state comparison

What this fixture proves

A resilient reader needs to preserve hierarchy, inline runs, and real document furniture. [inert D431 fixture link](#) is a real external OOXML hyperlink; the application must keep it inert or validate it before opening.

Review checklist

- Header and footer remain visible.
- Lists retain indentation and wrapping.
- Tables do not collapse their column logic.

Surface	Expected	Reason
Portrait	Readable body	Default reading mode
Landscape	Wide matrix	Section geometry
Review	Tracked change markup	Revision fidelity

Original embedded color study:

Revision state: ~~retired wording~~approved wording

Landscape section — comparison matrix

Fixture	Pages	Headers	Tracked	Notes
Case 01	2	yes	no	bounded visual evidence
Case 02	3	yes	no	bounded visual evidence
Case 03	4	yes	yes	bounded visual evidence
Case 04	1	yes	no	bounded visual evidence
Case 05	2	yes	no	bounded visual evidence
Case 06	3	yes	yes	bounded visual evidence
Case 07	4	yes	no	bounded visual evidence
Case 08	1	yes	no	bounded visual evidence
Case 09	2	yes	yes	bounded visual evidence
Case 10	3	yes	no	bounded visual evidence
Case 11	4	yes	no	bounded visual evidence
Case 12	1	yes	yes	bounded visual evidence

The page intentionally changes orientation so renderers must create a new canvas geometry.

Return to portrait

The final section confirms that the layout can return to the original page geometry after a landscape comparison table.
